10XTECHCLUB™
BE BRILLIANT, BE LIMITLESS

Beyond Academics: The Ultimate STEM Competition Handbook

Discover National and International Competitions That Help Students Turn Curiosity into Innovation.

162
unique competitions

11
categories

For students and parents
exploring what is possible beyond academics.

Robotics · Science · Mathematics · Coding · AI · Innovation · Entrepreneurship · Space · Drones · Game Development · National

Released October 2026 · 10xtechclub.com

Informational list only. 10xTechClub does not endorse these competitions. Verify eligibility, dates, fees and rules on official organiser websites.

About this handbook

What is 10xTechClub?

10xTechClub is a hands-on STEM learning and technology education centre in Pune, India. Students explore emerging technologies, build real-world projects and develop future-ready skills through experiential, project-based learning in areas such as Robotics, Artificial Intelligence (AI), Coding, Electronics, Python, 3D Printing, IoT and SpaceTech.

Learning goes beyond textbooks. Students are encouraged to experiment, solve problems, collaborate, design prototypes, take part in hackathons and turn ideas into working projects, with mentor guidance along the way.

Every curious learner deserves opportunities to explore their potential beyond the classroom. This handbook brings together a curated guide to STEM, robotics, science, AI, coding, engineering, space and innovation competitions in India and around the world. It is designed for curious students from primary school through university, and for the parents who support them.

How to use this handbook

Four steps take you from browsing to a decision. Each step is covered in the pages that follow.

1 Discover

Browse 162 competitions across 11 categories, from robotics and mathematics to space science and game development.

2 Explore

Use the age guide and the Age/Grade and Scope columns to shortlist what fits your child's age, grade and interests.

3 Prepare

Building projects, experimenting, practising problems and getting feedback from a mentor all help students develop the skills these competitions reward.

4 Take the next step

If your child would like hands-on, project-based support, the final pages explain how to find out more about 10xTechClub's programmes.

For more details and the latest updates, visit 10xtechclub.com.

Category directory

11 categories, 162 competitions

Click a category name to jump to its table. Page numbers are shown on the right.

Category	Competitions	Page
Robotics & Engineering	31	6
Science & Research	12	8
Mathematics & Olympiads	16	9
Coding & Computational Thinking	17	10
Artificial Intelligence	11	11
Innovation & Design	11	12
Entrepreneurship	15	13
Space & Astronomy	18	14
Drones & Autonomous Systems	10	15
Game Development & Interactive Technology	18	16
National & Academic Competitions	14	17

Counting. The directory lists 162 competitions across 11 categories, as 173 category listings. 11 listings repeat a competition that is also listed elsewhere in the directory. Each competition is counted once in the headline total. Entries are listed alphabetically within each category.

Reading the tables

How to use this directory

Every category uses the same eight columns. The table below explains what each one means.

Column	What it tells you
Competition	The name of the competition or programme. Where a competition appears in two categories, it is listed on both pages.
Scope	Where it runs. National means within India. International means open to students from more than one country. National International means a national selection leads to an international event.
Age/Grade	Eligibility as published by the organiser, given as an age range or school grade. Eligibility changes, so confirm it on the official website before you register.
Format	Individual, Team, or Individual / Team where both are possible.
Difficulty	A 1 to 5 star editorial estimate to help with comparison. It is not an official rating from any organiser. "Under review" means no rating has been confirmed yet.
Domain	The subject area or sub-field of the competition, such as Robotics, Competitive Programming or Drone Racing.
Focus	A short description of what the competition emphasises.
Official website	The organiser's website, shown as a short domain label. Click it to open the site. Dates, fees and rules are published there.

Markers. * status or edition to be confirmed before you rely on it. † listed as historical or discontinued in the source; check current status. ★ difficulty estimate. Links marked ↗ open the official site in a new tab.

Age-based starting points

Where to start

Not sure which competitions suit your child? The examples below are grouped by the age or grade each organiser lists. Use them as starting points for research, not as official endorsements or personal recommendations. Always confirm eligibility on the organiser's website.

Ages 6 to 10	Ages 11 to 14	Ages 15 to 18	University and 18+
FIRST LEGO League Explore 6–10 Years Lists: Robotics & Engineering · International	**FIRST LEGO League Challenge** 9–16 Years Lists: Robotics & Engineering · International	**FIRST Tech Challenge (FTC)** 12–18 Years Lists: Robotics & Engineering · International	**VEX U** 18–22 Years Lists: Robotics & Engineering · International
Junior Botball 5–14 Years Lists: Robotics & Engineering · International	**World Robot Olympiad (WRO)** 8–19 Years Lists: Robotics & Engineering · National International	**FIRST Robotics Competition (FRC)** 14–18 Years Lists: Robotics & Engineering · International	**International Collegiate Programming Contest (ICPC)** 18–22 Years Lists: Coding & Computational Thinking · International
Kangaroo Math Competition Grades 1–12 (6–18 Years) Lists: Mathematics & Olympiads · International	**Broadcom MASTERS** 11–14 Years Lists: Science & Research · International	**Regeneron International Science and Engineering Fair (ISEF)** Grades 9–12 (14–18 Years) Lists: Science & Research · International	**Hult Prize** 18–22 Years Lists: Entrepreneurship · International
Bebras Challenge Grades 3–12 (8–18 Years) Lists: Coding & Computational Thinking · International	**Purple Comet! Math Meet** 11–18 Years Lists: Mathematics & Olympiads · International	**International Olympiad in Artificial Intelligence (IOAI)** 14–18 Years Lists: Artificial Intelligence · International	**Microsoft Imagine Cup** 18–22 Years Lists: Artificial Intelligence · International
Minecraft Education Build Challenge 6–18 Years Lists: Game Development & Interactive Technology · International	**Technovation Girls** 8–18 Years Lists: Artificial Intelligence · International	**Diamond Challenge** 14–18 Years Lists: Entrepreneurship · International	**James Dyson Award** 18 Years & Above Lists: Innovation & Design · International

Ages are taken from each competition's Age/Grade column. Some organisers set eligibility by grade rather than age, and some competitions have more than one level. A competition's presence here does not mean it is currently open for registration.

Robotics & Engineering 31 competitions

Competition	Scope	Age/Grade	Format	Difficulty	Domain	Focus	Official website

Take the next step

Help Your Child Turn Curiosity into Capability

Discover hands-on technology learning at 10xTechClub, where students explore emerging technologies, build projects and develop practical problem-solving skills.

- ✓ Hands-on robotics and engineering projects
- ✓ Coding and artificial intelligence
- ✓ Electronics and emerging technologies
- ✓ Project-based learning
- ✓ Mentor guidance
- ✓ Creativity, collaboration and problem-solving skills

Hands-on programmes build skills over time. Taking part in a programme does not guarantee results in any competition.

Important information

Disclaimer

Curated for informational purposes only. 10xTechClub does not endorse these competitions. Verify current eligibility, dates, fees and rules on official organiser websites.

This list is provided for general information only and is a suggested starting point, not a complete or definitive directory. Inclusion of a competition does not mean that 10XTECHCLUB endorses, sponsors, recommends, or is affiliated with the competition or its organisers, and no guarantee is made about its quality, suitability, outcomes, or recognition. Names, eligibility, dates, fees, formats, and website addresses may change or become outdated. Families should verify all details directly with the official organiser and use their own judgement before registering or paying any fees. All names and trademarks belong to their respective owners.

About the notes in this handbook. Difficulty stars are editorial estimates, not official organiser ratings. Entries marked * or † need a status check before use. Website links point to the organiser or the most relevant public page the source gave. Competition details change every year, so treat this handbook as a starting point and confirm everything on the official site.
